Monitoring of COVID-19

Find the latest listings and follow the evolution of COVID-19 on this page.

Last edited on May 25, 2020

Statens Serum Institut monitors COVID-19 via [the Danish Microbiology Database \(MiBa\)](#). MiBa COVID-19 data is linked to other health records and laboratory data from the country's clinical microbiology departments (KMA).

In addition, the prevalence of infection in the community is monitored via [COVID-meters](#), by testing people with mild symptoms in the population and via samples in groups of randomly selected healthy citizens. In addition, the population's immune status will be examined in cooperation with the blood banks. Mortality in Denmark is monitored via [EuroMOMO](#), which also contains data for a number of other European countries.

Today's COVID-19 figures for Denmark

Number of tests, people tested, confirmed cases, number of infections and deaths in Denmark as well as change since yesterday. Figures are updated daily at: 14th

	Number of samples	Number tested	Confirmed cases	Over infection	Deaths (%)
Number today	546621	458305	11387	9964	563 (5.0)
Change since yesterday	8879	6855	27	64	1

Total number of inpatients and on intensive and intensive ventilators respectively. Updated daily at 14th

	hospitalized	Of which hospitalized in intensive care	Of which hospitalized on intensive and in respiratory
Number today	116	20	16
Change since yesterday	1	-1	-1

Explanations for the table

Today's COVID-19 figures for the Faroe Islands and Greenland

Number of samples, people tested, confirmed cases, number of infections and deaths. Updated daily at 14th

	Number tested	Confirmed cases	Over infection	Deaths (%)
Faroe Islands	9178	187	187	0
Greenland	1885	12	11	0

Download [monitoring file](#) (zip csv file updated on weekdays at 2pm). The file contains data on the number of infected and tested by municipality, number of infected by sex and age, death over time and number of new admissions. See also our [archive of previously published data](#). See how to [save the monitoring page as a pdf](#).

[Read more about the outbreak with COVID-19](#), infection [hygiene](#) guidelines, model calculations for scenarios when reopening Denmark, and find the weekly Trend and Focus reports from SSI.
