One more person tested positive for COVID-19 in Barbados yesterday.

Results returned by the Best-dos Santos Public Health Laboratory today revealed that a 24-year-old man who was identified through contact tracing was the only positive case out of 22 tests carried out on Sunday.

That brings the total number of COVID-19 positive patients now in isolation to 34.

Meanwhile, health officials have reported that the majority of persons who have been diagnosed have very mild symptoms, and thus far, only two are in acute care.
